JETHEX
EURO TALENT HUNT EXAM 2026

CLASS : VIII Moving to IX

euro
JEE – NEET

Time	**: 60 Minutes**
Marks	**: 240**
Medium	**: English**

Important Instructions :

1. The Answer Sheet is inside this Test Booklet. When you are directed to open the Test Booklet, take out the Answer Sheet and fill in the particulars on **ORIGINAL Copy** carefully with **blue/black ball point pen only**.

2. The test is of **90 minutes** duration and the Test Booklet contains **60 multiple-choice questions** (four options with a single correct answer) from **Physics, Chemistry, Biology, Mathematics, Mental Ability & Astronomy.**

3. Wherever the symbols/constants are not mentioned, they are to be considered as per their standard meaning/value.

4. Each question carries **4 marks**. For each correct response, the candidate will get **4 marks**.The **maximum marks are 240**.

5. Use **Blue/Black Ball Point Pen only** for writing particulars on this page/marking responses on Answer Sheet.

6. Rough work is to be done in the space provided for this purpose in the Test Booklet only.

7. On completion of the test, the candidate **must hand over the Answer Sheet (ORIGINAL and OFFICE Copy)** to the Invigilator before leaving the Room/Hall. The candidates are allowed to take away this Test Booklet with them.

8. The candidates should ensure that the Answer Sheet is not folded. Do not make any stray marks on the Answer Sheet. Do not write your Roll No. anywhere else except in the specified space in the Test Booklet/Answer Sheet.

9. Use of white fluid for correction is **NOT** permissible on the Answer Sheet.

10. Each candidate must show on-demand his/her Admit Card to the Invigilator.

11. No candidate, without special permission of the centre Superintendent or Invigilator, would leave his/her seat.

12. The candidates should not leave the Examination Hall without handing over their Answer Sheet to the Invigilator on duty and sign (with time) the Attendance Sheet **twice**. Cases, where a candidate has not signed the Attendance Sheet second time, will be deemed not to have handed over the Answer Sheet and dealt with as an **Unfair Means case**.

13. Use of Electronic/Manual Calculator is prohibited.

14. The candidates are governed by all Rules and Regulations of the examination with regard to their conduct in the Examination Room/Hall. All cases of unfair means will be dealt with as per the Rules and Regulations of this examination along with Public Examinations (Prevention of unfair means act 2024).

15. No part of the Test Booklet and Answer Sheet shall be detached under any circumstances.

16. The candidates will write the Correct Test Booklet Code as given in the Test Booklet/Answer Sheet in the Attendance Sheet.

Name of the Candidate (in Capitals) : …….

Roll Number : in figures ……...

In words ……

Candidate's Signature : …… Invigilator's Signature : ……...

PART I - PHYSICS

This section contains **10 Multiple Choice Questions**. Each question has four choices (A), (B), (C) and (D) out of which **ONLY ONE** is correct

Q.1. A cyclist travels 180 m in 30 s and returns 60 m in 20 s. What are the average speed and magnitude of average velocity for the whole journey?

A. 4.8 m/s and 2.4 m/s
B. 2.4 m/s and 4.8 m/s
C. 6 m/s and 2.4 m/s
D. 4.8 m/s and 4.8 m/s

Q.2. A stopwatch reads 12.5 s for five complete pendulum oscillations. If the reading has a 0.5 s positive error, the corrected time period is:

A. 2.4 s
B. 2.5 s
C. 2.6 s
D. 12.0 s

Q.3. Two plane mirrors are perpendicular. A light ray successively reflects from both mirrors. Its final direction compared with its initial direction is:

A. Perpendicular
B. Parallel and the same sense
C. Parallel but opposite sense
D. Always 45° apart

Q.4. The Sun is at an elevation of 30°. A vertical pole casts a shadow $6\sqrt{3}$ m long. Its height is:

A. 3 m
B. 6 m
C. 9 m
D. 18 m

Q.5. An electric heater rated 800 W operates for 15 minutes. Energy converted into heat is:

A. 12 kJ
B. 120 kJ
C. 720 kJ
D. 12,000 kJ

Q.6. Two identical wires are separately connected across the same battery. Wire P is twice as long as wire Q, and they have identical cross-sections and material. Assuming fixed resistance per unit length, heat produced in P in one minute compared with Q is:

A. Twice
B. Half
C. Four times
D. Same

Q.7. A force of 120 N is applied uniformly over an area of 0.04 m^2. If the area is halved while the force stays constant, pressure becomes:

A. 1500 Pa
B. 3000 Pa
C. 6000 Pa
D. 12,000 Pa

Q.8. During a cyclone, the air pressure near the centre is usually lower than in the surroundings. The principal reason surrounding air accelerates inward is:

A. Gravity disappears
B. Air moves from higher toward lower pressure
C. Low-pressure air becomes solid
D. The Earth stops rotating

Q.9. A student pushes a stationary box with a horizontal force of 40 N, but the box does not move. The mechanical work done by this force on the box is:

A. 0 J

B. 40 J
C. 400 J
D. Cannot be determined without mass

Q.10. Two forces of 9 N east and 12 N north act simultaneously on a body. The magnitude of their resultant is:

A. 3 N
B. 15 N
C. 21 N
D. 108 N

PART I - CHEMISTRY

This section contains **10 Multiple Choice Questions**. Each question has four choices (A), (B), (C) and (D) out of which **ONLY ONE** is correct

Q.11. A sample contains equal numbers of two different types of uncombined atoms. The sample must be classified as:

A. A pure compound
B. A mixture of elements
C. An element
D. A mixture of compounds

Q.12. Which observation gives the strongest evidence of a chemical reaction rather than a physical change?

A. Ice becomes water
B. Salt disappears on stirring in water
C. Two clear solutions form an insoluble solid
D. A metal wire is bent

Q.13. An unknown solution turns red litmus blue and has pH 11. It should be classified as:

A. Strongly acidic
B. Weakly acidic
C. Basic
D. Neutral

Q.14. A mixture contains sand, salt and iron filings. Which sequence best yields each component separately?

A. Dissolve, evaporate, then filter
B. Magnet, dissolve in water, filter, evaporate filtrate
C. Filter dry mixture, then distil
D. Use only a separating funnel

Q.15. A saturated solution at 50°C is cooled to 20°C and crystals appear. The most reasonable explanation is:

A. The solute transformed into a new element
B. The solvent was chemically consumed
C. Solubility decreased on cooling
D. The solution became a pure element

Q.16. If 20 g of salt dissolves completely in 80 g water, the mass percentage of salt in the solution is:

A. 20%
B. 25%
C. 16%
D. 80%

Q.17. Which combination can be separated by a magnet without a chemical reaction?

A. Iron and sulphur powder before heating
B. Iron sulphide compound
C. Dissolved sugar and water
D. Salt and sand

Q.18. Which statement about particles is most consistent with diffusion being faster in gases than in liquids?

A. Gas particles never collide
B. Gas particles generally move more freely and spread more rapidly
C. Liquids contain no spaces between particles
D. Gas particles are always heavier

Q.19. A student passes carbon dioxide through limewater and observes milkiness. This is best considered:

A. Only a change of state
B. Evidence for formation of a new substance
C. Evidence of melting
D. A magnetic change

Q.20. Which sample is necessarily a pure substance?

A. Filtered river water
B. Air
C. Distilled water
D. Brass

PART I - BIOLOGY

This section contains **10 Multiple Choice Questions**. Each question has four choices (A), (B), (C) and (D) out of which **ONLY ONE** is correct

Q.21. A student sees tiny moving objects in a drop of pond water. Which follow-up would most reliably support that they are living microorganisms?

A. Increase microscope brightness only
B. Look for growth or reproduction over time
C. Add ink to darken the water
D. Heat the water to boiling

Q.22. Why is a thin specimen usually preferred when using a school compound light microscope?

A. It creates more cells
B. It permits light transmission and clearer detail
C. It increases the objective magnification
D. It eliminates all microorganisms

Q.23. A cell has a membrane, cytoplasm and nucleus but lacks a rigid cell wall. It is most likely:

A. An animal cell
B. A mature xylem vessel
C. A bacterial cell
D. A typical leaf epidermal cell with a wall

Q.24. Which pair correctly matches the deficiency with the likely health effect?

A. Vitamin C — rickets
B. Iron — anaemia
C. Iodine — scurvy
D. Vitamin D — night blindness

Q.25. In a controlled photosynthesis experiment, two identical plants are kept in light; one is supplied with carbon dioxide and the other is deprived of it. Which is the independent variable?

A. Plant species
B. Light intensity

C. Carbon dioxide availability D. Amount of starch formed

Q.26. After a leaf is destarched and then kept in sunlight, its exposed green region turns blue-black with iodine. This directly indicates the presence of:

A. Oxygen B. Protein
C. Starch D. Carbon dioxide

Q.27. An organism is observed taking in oxygen and releasing carbon dioxide in darkness. Which conclusion is valid?

A. It cannot be a plant
B. Cellular respiration can occur without light
C. Photosynthesis is faster in darkness
D. It has stopped all metabolism

Q.28. If a plant's root hairs are severely damaged while the leaves remain intact, the most immediate expected effect is reduced:

A. Water and mineral uptake
B. Pollination
C. Seed dispersal
D. Absorption of sunlight by chlorophyll

Q.29. Which action most directly breaks the breeding cycle of mosquitoes that transmit some diseases?

A. Spray perfume indoors
B. Remove stagnant water containers
C. Store water uncovered
D. Increase room lighting

Q.30. Food is broken down and its energy is released in living cells by respiration. Which statement is correct?

A. Plants respire only at night
B. Animals respire but plants do not
C. Both plants and animals respire
D. Respiration and breathing are exactly identical

PART I - MATHEMATICS

This section contains **10 Multiple Choice Questions**. Each question has four choices (A), (B), (C) and (D) out of which **ONLY ONE** is correct

Q.31. If $3(2x-5)-2(x+4)=17$, then x is:

A. 8 B. 9
C. 10 D. 11

Q.32. The sum of five consecutive integers is −35. The largest integer is:

A. −9 B. −7
C. −5 D. −3

Q.33. The least positive integer by which 540 must be multiplied to make a perfect square is:

A. 3 B. 5
C. 15 D. 30

Q.34. If $a^2-b^2=63$ and $a-b=7$ for positive integers a and b, then a+b equals:

A. 7 B. 9
C. 11 D. 14

Q.35. The exterior angles of a convex polygon are all equal to 18°. How many diagonals does it have?

A. 150 B. 170
C. 180 D. 190

Q.36. In a quadrilateral, angles are in the ratio 2:3:4:6. The largest interior angle equals:

A. 120° B. 132°
C. 144° D. 150°

Q.37. Eight workers finish 3/5 of a job in 9 days. At the same rate, how many more days will 12 workers need to finish the remaining job?

A. 3 B. 4
C. 5 D. 6

Q.38. A trader marks an item 25% above cost price and then allows a discount of 12% on the marked price. The profit percentage is:

A. 10% B. 11%
C. 13% D. 15%

Q.39. The mean of six numbers is 18. If one number, 30, is replaced by 12, the new mean is:

A. 12 B. 14
C. 15 D. 16

Q.40. A cube has total surface area 294 cm^2. Its volume is:

A. 216 cm^3 B. 294 cm^3
C. 343 cm^3 D. 512 cm^3

PART II – MENTAL ABILITY

This section contains **10 Multiple Choice Questions**. Each question has four choices (A), (B), (C) and (D) out of which **ONLY ONE** is correct

Q.41. Find the missing term: 4, 9, 19, 39, 79, __

A. 119 B. 139
C. 159 D. 169

Q.42. In a code, PLANET is written as QMBOFU. How is ORBIT written using the same rule?

A. PSCKU B. PSCJU
C. NQAHS D. PSBJU

Q.43. M is the mother of N. N is the brother of P. P is the father of Q. How is M related to Q?

A. Aunt B. Grandmother
C. Sister D. Mother

Q.44. A person walks 4 km north, 6 km east, 4 km south and 2 km west. How far and in which direction from the starting point?

A. 4 km east B. 8 km east

C. 4 km west
D. 2 km north

Q.45. In a row, A is 17th from the left and 23rd from the right. If four students join at the left end, how many students are there now?

A. 39
B. 40
C. 43
D. 44

Q.46. Which term does not belong: 8, 27, 64, 100, 125, 216?

A. 27
B. 64
C. 100
D. 216

Q.47. If all R are S, and no S are T, which conclusion must be true?

A. Some R are T
B. No R are T
C. All T are R
D. All S are R

Q.48. A standard die has opposite faces summing to 7. If the top face is 5 and the bottom face is hidden, the bottom number is:

A. 1
B. 2
C. 3
D. 4

Q.49. At 4:20, the smaller angle between the hour and minute hands is:

A. 5°
B. 10°
C. 20°
D. 30°

Q.50. In a group, 28 like football, 24 like cricket, and 9 like both. If everyone likes at least one, the number of people is:

A. 43
B. 52
C. 61
D. 33

PART II – ASTRONOMY

This section contains **10 Multiple Choice Questions**. Each question has four choices (A), (B), (C) and (D) out of which **ONLY ONE** is correct

Q.51. At new moon, why is the sunlit half of the Moon largely hidden from Earth?

A. Earth is always between Sun and Moon
B. The Moon lies approximately between Earth and Sun
C. The Sun stops shining
D. The Moon enters Earth's shadow every month

Q.52. A lunar eclipse occurs when:

A. The Moon is between Earth and Sun
B. Earth is between Sun and Moon and its shadow falls on the Moon
C. Mercury passes the Sun
D. Earth enters the Moon's shadow

Q.53. If Earth rotated once every 48 hours instead of 24, while all else stayed the same, the approximate length of one solar day would be:

A. 12 hours
B. 24 hours
C. 48 hours
D. 365 days

Q.54. Why is a light-year useful in astronomy?

A. It measures star age
B. It expresses extremely large distances
C. It measures the speed of Earth's rotation
D. It counts lunar months

Q.55. The Moon is visible in different shapes across a month primarily because:

A. Its shape changes
B. Earth's shadow causes every phase
C. The visible portion of its sunlit hemisphere changes
D. Clouds cover different portions of it

Q.56. Which ordering lists objects from smallest scale to largest scale?

A. Solar System, Earth, Milky Way, Universe
B. Earth, Solar System, Milky Way, Universe
C. Milky Way, Earth, Universe, Solar System
D. Universe, Galaxy, Solar System, Earth

Q.57. If a planet is much farther from the Sun than Earth, its orbital period is generally:

A. Shorter
B. Longer
C. Always one year
D. Always one month

Q.58. Which event requires the Moon to be near the new-moon phase?

A. Lunar eclipse
B. Solar eclipse
C. Full-moon rise
D. Any meteor shower

Q.59. A star appears to move across the sky from east to west through the night. The main cause is:

A. Earth's west-to-east rotation
B. The star orbiting Earth daily
C. Earth's revolution around the Sun
D. The Moon's gravity

Q.60. Which feature most reliably separates a star from a planet?

A. A star produces light mainly through its own energy generation; a planet primarily reflects starlight
B. A planet must have a tail
C. Every star is smaller than Earth
D. Every planet produces its own visible light
